

Curriculum Vitae of
Giovanni Lagioia

Personal information

ORCID: 0000-0002-7044-602X

Surname(s) / First name(s) Lagioia Giovanni

Address(es) *University of Bari Aldo Moro*, Department of Economics, Management and Business Law, Bari, Italy and *Catholic University Our Lady of Good Counsel*, Faculty of Economics, Tirana, Albania.

Telephone(s) +39 080 5715086, +39 347 3819172, 355 67 4915704

e-mail giovanni.lagioia@uniba.it – g.lagioia@unizkm.al

Nationality Italian

Work experience

Dates **Degree in Economics** (1991), **PhD** (1995) in "Environmental impacts of production cycle of commodities", **researcher** of Commodity Science (SECS-P/13) in the period 1993 - 2001, **associate professor** since 2001.

Occupation or position held **Full Professor** of Commodity Science since 2006;
Head of Department of Economics, Management and Business Law (2018-) of the University of Bari Aldo Moro;
Deputy Rector at the Catholic University Our Lady of good Counsel (2019-) for cooperation with business companies and labor market.

Main activities and academic responsibilities **Teaching** of Commodity Science, Resources and Waste Management, Environmental Strategies for Circular Economy, Technologies and Environmental Certification. Technology of production cycles.
Seminars about several commodity science topics in higher educational courses, Masters, European Module Jean Monnet and Physical Doctor courses of other Italian Universities.
Member of research group regarding the ecological analysis of technological innovation of wood and derivatives production processes within the programme Interreg II Italia Albania Sottomisura 6.2.e: Improvement of techniques of forest species propagation and wood use.
Member of Task Force to support Environmental Authority of Regione Puglia in defining indicators and evaluation of sustainability of regional system (Strategical Environmental Assessment, Waste Working Group).
Member of Input-Output analysis Working Group set up by SETAC Europe.
Member of Working Group on Industrial Uses of bio-technologies: commodities by chemical industry and energy within the PRAI Puglia - *Programme for Innovation and improvement of the relation industry-research through Bio-technologies*, supported by European Union (F.E.S.R. 2000-2006).
Director of the Master "Expert for agroindustry chain of typical local produce, POR-Puglia 2000-2006. Misura 3.7 "Formazione sueriore".

Vice-Director of Jean Monnet Module (2004-2008).

Leader Partner of the Tempus project no. 530531 ELISAA (Tempus-1-2012-1-IT-IT-JPHES-EU) E-learning Innovation and Sustainable Albanian agriculture (2012-2015).

Associate Partner INGRID -High-capacity hydrogen-based green-energy storage solutions for grid balancing, Tender of the Call "ENERGY.2001.7.3-2: Storage and balancing variable electricity supply and demand", European Union (2017);

Deputy Dean of Faculty of Economics, University of Bari, for Erasmus program (2011-2012)

Deputy Dean of Dept. of Economics, Management and Business Law-University of Bari Aldo Moro, for Erasmus program (2012-2018)

Reviewer for International scientific Journals.

Member of the Editorial Board of International scientific Journals.

Director of Bachelor in Business Administration and Master in Business Consulting – University of Bari Aldo Moro (2012-2018).

Coordinator of the PhD in Economics and Management – University of Bari Aldo Moro (2013-2018).

Deputy Head of Department of Economics, Management and Business Law (2013-2018).

Dean of the Faculty of Economics, Political and Social Science – Catholic University Our Lady of Good Counsel (2016-2019).

Member of the Executive Board of the Italian Association of Commodity Science.

Member of Italian Platform on Circular Economy stated by ENEA and Italian Government (2018-).

Name and address of employer University of Bari Aldo Moro, Department of Economics, Management and Business Law

Research activity The main research interests refer to environmental impact of the production processes and consumption, industrial ecology and circular economy. His activity is mainly based on life cycle analysis of commodities to describe the circulation of energy and materials in each production cycle, or in each industrial sector or in the whole economic system. He uses the results of studies about energy and material circulation to construct Intersectoral Table of economy in physical units (PIOT, Physical Input-Output Table). In this field he is component of Input-Output analysis Working Group set up by SETAC Europe, and it has been carried out several experiences working together with international research institutes, as Wuppertal Institute (Germany) making one of the first deep analysis of material flows of the Italian economic system. The production chains studied are primary aluminium, potato products (chips, French fries, dehydrates), animal sector, sugar, sugar-beet cultivation, Integrated Circuits, Mercury. Bioeconomy. Another important field of research is the analysis of relations between resources, commodities and environment in order to illustrate the burdens that production and consumption of commodities cause in the environment.

Based on these research experiences he participates in several projects to evaluate sustainability of regional system, or of some commodities to illustrate the role of bio-technologies.

Furthermore, he studies technical and commodity characteristics of some goods, as platinum group metals and electronic goods.

In conclusion, the main interests of research refer to the following topics:

- Studies on the relationships between resources, commodity and environmental.
- Studies on the material flow analysis and environmental impact on the production processes and consumption (Material Flow Analysis, MFA - Substance Flow Analysis, SFA).
- Physical Input-Output Analysis of the whole economy.
- Technical-economic researches of the production processes under the concept of industrial ecology.
